

Total time spent: 60 minutes

The purpose of the project is to create recommendations of anime for the user to watch based off their interests and preferred genre (ex. Sports, Sci-Fi, etc.). This will be done by scrapping data off of CrunchyRoll a popular on-demand service for anime, utilizing that data to categorize the types of anime, the rating and popularity of the anime. The project will also allow users to rate their rating, allowing the developers to improve their alogirithm for personal recommendations.

Backlog   6	In progress   8	Blocked   4	Done   4
<div>Team A   14</div> <div>As a user I want to see the title and a poster of the show that was recommended.</div> <div>As a user I wants to continue where I left off on a pervious episode point</div> <div>As a user I want to be able to see reviews for each show. I also want be able to create/edit/delete my own reviews.</div> <div>Type something</div> <div>+</div>	<div>As a user I want to be have only the top rated of that genre recommended to me.</div> <div>As a user I want to be able to add shows to a watchlist.</div> <div>As a user I want to specify a certain anime show and get a list of similar shows that I would like based on that.</div> <div>As a user I want to be able to provide feed back on the shows recommended to me.</div> <div>Type something</div> <div>Type something</div> <div>+</div>	<div>Type something</div> <div>Type something</div> <div>+</div>	<div>Type something</div> <div>Type something</div> <div>+</div>
